

## Stefan Brock CV.

Prof. Dr. Stefan Brock works at Poznan University of Technology, in the Faculty of Automation, Robotics and Electrical Engineering, and heads the Division of Control and Industrial Electronics. His research interests include issues related to the control of electric drives and mechatronic systems using new control methods, especially machine learning methods and soft-computing techniques. He teaches courses in the application of machine learning methods, drive control and industrial automation systems. In addition to his home university, he has taught in Turkey, the Czech Republic, Romania, Russia and Germany. He is a member of the IEEE and a fellow of the EPE steering committee.
